

PROCEDURES AND POLICIES:

We have well established policies and procedures for maintaining the physical and academic support facilities of the college. The college has formed various committees and subcommittees for supervising the maintenance of these facilities and ensuring their optimum utilization. The Building Development Committee looks after the repair works in the buildings. The Finance Subcommittee allocates the necessary fund after going through the proposal for repair work placed by the Building Committee. The classrooms are kept clean and well maintained. The students enrolled in NSS and NCC also take an active role in keeping the campus clean.
